Dairy Calf Club Fair Results.

The Didsbury Dairy Calf Club held their fourth annual exhibition and judging competition in connection with the Agricultural Fair last Wednesday. Thirty-five animals were exhibited by members of the Club and 18 took part in the judging competition. Mr. E. W. Bjorkeland of Red Deer acted as judge.

Douglas Burns is president of the Club; Harvey Stevens, sec-treas.; Reid Clarke and Mr. Parkinson, supervisors.

Calf Class

The calves were judged according to the following points: 1 preparation, 2 showmanship, 3 quality, and the winners were as follows:

- 1 Harvey Stevens
- 2 Paul Hansen
- 3 Delbert Levagood
- 4 Henry Brown
- 5 Glen Roberts

Yearling Class

- 1 Paul Hansen
- 2 Dorothy Bruce
- 3 Grenville McCaig
- 4 Delbert Levagood
- 5 Enid Roberts

2 year old Class

- 1 Enid Roberts
- 2 Dorothy Bruce
- 3 Owen Hardbatt
- 4 John Hardbatt

The standing in the Judging Class

- 1 Henry Brown
- 2 Clayton Dippel
- 3 Harvey Stevens
- 4 Marion Levagood
- 5 Paul Hansen
- 6 Enid Roberts
- 7 Wilbur Woods
- 8 Douglas Burns
- 9 Lois Woods
- 10 Grenville McCaig
- 11 Glen Roberts
- 12 John Bruce
- 13 John Hardbatt
- 14 Dorothy Bruce
- 15 Harold Burns
- 16 Eric Hansen
- 17 Owen Hardbatt

The winner, Henry Brown, received W. A. McFarquhar's special prize which he offered for the best judge in the contest.

Registration for Dividends Monday

According to notices posted around Town, registration for Basic Dividends will be held on MONDAY, AUGUST 10th, in the LEUSZLER BLOCK.

The registration for the Didsbury Constituency is in the hands of the local M.L.A., E. P. Foster, and he has appointed Mr. Ray Lantz to have charge of Didsbury East and Didsbury West polling divisions. Mr. Lantz informs us that he will appoint other Social Crediters to assist him with the registration.

The registration will be held in all the polling divisions in Didsbury Constituency the same day.

In the West registration will be held at Melvin School, in charge of A. L. Cowitz; at Erickson's House, Bergen, in charge of Mr. Erickson, and at Elkton School, in charge of F. F. Byrt.

Mr. Lloyd Hehn has charge of the registration East of Didsbury, which will be held at Neapolis School, Lone Pine Hall and Sunnyslope.

The notices state that all must register who desire dividends. They will also be required to sign a covenant, promising to co-operate with the government in every possible way.

Softball Team Has Entered Playoffs

The "Didsbury Flashes," local softball team have entered the Provincial Intermediate Playoffs and their first game will be played tonight (Thursday) against Ghost Pine at that place.

The second and third games will be a double header, played at Didsbury on Monday at 3 p. m. and 6:30 p. m.

The local team will appear in their new sweaters which were purchased this week and supplied by J. V. Berscht. The colors are red, white and black, with the name "Flashes" on the front and a streak of lightning on the back.

Truth Outrivals Fiction, in "The Man They Couldn't Hang"

Unique Talking Picture Coming to Opera House Next Wednesday.

Hollywood fiction writers have invented many awesome "thrillers," but none of them would venture to pen a story in which its principal character stood, three times within an hour, on the brink of eternity, successfully passing the ordeal of remaining bound on the death trap, listening time and time again to the click of levers refusing to do their allotted task. Yet this incident is but one of many in the charmed life of John Lee, whose nickname, "The Man They Could Not Hang," earned from bitter experience, forms the feature attraction next Wednesday only at the Opera House.

A special prologue featuring W. Leonard Howe, stage and screen star and friend of Lee, precedes each screening and affords a thrilling introduction, showing the actual places and people concerned.

By special arrangement this big road show attraction will play here at regular prices — DON'T MISS IT

Memorial Service.

The Annual Memorial Service in honor of their departed comrades, was held by members of the local branch of the Canadian Legion at the Memorial Cairn on the Butte last Sunday afternoon. The returned men paraded to the cairn headed by the Didsbury Boys' Band.

The service was conducted by Comrade Rev. N. W. Whitmore, of Olds, who also gave an appropriate address and paid tribute to those comrades who had fallen during the Great War.

Wreaths were placed at the foot of the memorial by Mr. W. A. Austin, president of the Didsbury Branch of the Legion, and Mrs. Lowrie, Regent of the local Chapter of the I.O.D.E. Wreaths were also laid by local citizens and children.

Following the close of the service selections were rendered by the Boys' Band.

Wheat Board Price To Continue Until New Level is Fixed

The Canadian Wheat Board has authorized continuation of the purchase of wheat for account of the board after July 31, 1936, on the basis of the present fixed price of 87½ cents No. 1 Northern, Fort William or Vancouver, together with existing spreads for other grades, until such time as a fixed price for the new season is announced.

Cut-off date for 1935 crop will be July 31, and no further deliveries can be accepted for the 1935 crop years after midnight July 31, 1936.

The board has also instructed that all unused producers' certificates at country elevators and offices of the companies at the close of business July 31 be returned to the board. Producers' certificate books for the new season are now available to the companies, but must not be used for furnishing certificates to growers until a later date.

With wheat selling near the dollar mark at present, the wheat board can expect no offerings from farmers. If the price falls below the fixed price of 87½ cents, however, the farmers will be protected up to that amount by the board.

Mr. and Mrs. C. H. Adshead, who motored to Wyndell, B.C. to spend their vacation with Mrs. Adshead's parents, returned home on Sunday.

Population of Alberta Figures Being Released

Issued by authority of the Minister of Trade and Commerce, preliminary figures for the last Dominion census, showing the population of Alberta as at June 1, 1936, are now being released.

In the majority of Alberta towns and villages, increases in the number of residents is noted, but in some instances figures for 1936 as compared with 1931, the date of the previous census, show a decline.

Among the first Alberta figures just released for towns and villages the following are shown:

Towns —	1936	1931
Didsbury	849	801
Innisfail	1,124	1,024
Olds	1,196	1,056
Three Hills	653	581
Tofield	544	497
Villages —

Blackfalds	105	84
Delburne	236	193
North Red Deer	359	318

Will Discuss West Drouth

OTTAWA, Friday, July 31st — Plans have been made for a conference on the drouth and livestock situation between the Dominion cabinet and representatives of Alberta and Saskatchewan, at Ottawa, it was learned Friday. The conference probably will take place next Wednesday.

It was said Hon. Chas. Cockcroft, Alberta treasurer, now in Ottawa; Hon. J. G. Taggart, Saskatchewan minister of agriculture, and probably Premier Patterson, Saskatchewan, would be among the conferees.

Estimates last week said between 500,000 and 700,000 head of cattle must be moved from Southern Alberta alone, owing to threatened feed shortage.

It was expected the proposal of Nova Scotia's Premier Macdonald that freight rates be lowered so that eastern farmers might acquire some of the western cattle, would be discussed.

Evangelical Church Notes.

This Church desires to be a friendly household of faith, a school for Christian character, a power for God unto salvation, a center of helpful service, a force of civic righteousness, and an unfailing source of strength and inspiration for all who enter its doors. We extend a hearty invitation to all who appreciate these tenets to worship with us. We especially invite all persons who have no Church home, to make our Church their Church home.

The Young People's meetings will be discontinued until further notice.

Golf Notes.

The golf trophy competition which finished last week caused lots of interest. J. A. McGhee was the winner of the trophy and kindly put it up for competition again. Ed. Ranton had the lowest score, making a 37 hole total for his second round of nine holes. Competition is keen and the golfers are having a good year.

Welcomed Home.

A delightful shower was held on Friday evening when a group of about forty young people gathered at the home of Mrs. Mel Shantz to welcome Mr. and Mrs. Clarence Shantz, who were recently married in Ontario. Games were played, after which the gifts were opened and lunch served. We all join in wishing Mr. and Mrs. Shantz many years of wedded life together.

The Annual Meeting of the WCTU will be held in the Evangelical Church Parlors on Thursday, August 13th. All superintendents of departments are asked to have their reports ready. Following the reports there will be election of officers.

Home Markets For Local Produce

Assuming that a statement appearing recently in the daily press is correct, it seems an anomaly that a country so well equipped in many sections to produce wool as Canada should have to import that commodity from other countries.

Yet such apparently is the fact if credence can be given to the published assertion of L. R. McGregor of Toronto, Assistant Trade Commissioner for Australia to Canada when he said in a recent interview that "Canada is Australia's third best wool customer."

Not only are the western provinces well suited to wool production, both on large scale on the ranches in southern areas of Saskatchewan and Alberta and in all three prairie provinces on smaller scale from farm flocks, but it is generally conceded by authorities that conditions in these provinces enable Western Canada to produce wool of quality equal to the best anywhere.

Time was, not much more than a decade ago, when a substantial percentage of Western Canadian fleeces were offered to the market in poor condition. The quality often was there but many of the fleeces were greasy, filled with burrs and generally speaking ill prepared for market requirements.

Since that time, however, producers have learned a great deal about the preparation of wool, and the standard of the product has been vastly improved, so much so, in fact, that an unkempt fleece in shipments for market from the prairies is a comparative rarity today.

That being the case, it can be asserted with confidence that Western Canada can produce sufficient quality wool for domestic requirements in addition to considerable quantities annually for export, and the producer is now complying with market requirements in the preparation of his product.

Why, then, should it be necessary for Canada to import wool from other countries such as Australia and the Argentine? In the light of the facts, that appears an unanswerable question.

Another anomalous factor in the Canadian wool industry is the fact that although Eastern Canadian woolen mills are equipped with machinery to produce tops (wool in a partly manufactured condition) the machines are standing idle while tops are being imported from Great Britain. The reason, it is explained, is because tops can be manufactured more cheaply in England than in Canada. This is a plausible explanation, though the situation is an unfortunate one for this country, when it is remembered that there are plenty of idle workmen still in the East.

The anomalous situation at the production end, however, is one which should lead to some inquiries in the hope that the cause for a country like Canada importing wool can be discovered and, if feasible, rectified.

The statement made by the assistant trade commissioner for Australia engenders the thought that possibly there is room for considerable development of the domestic market for other Western Canadian agricultural products, and inspires the question whether everything that is possible is being done to ensure absorption of home products in local markets to the greatest possible extent. If other agricultural products are subjected to competition of similar imported commodities, it is a very unfortunate thing for the producers, and especially is this the case at a time when farmers are turning to greater diversification because they are forced to it by the European wheat situation.

Perhaps the solution to the problem of finding wider domestic markets for home grown products lies in the laboratory and this is a question worthy of investigation by farmer organizations, boards of trade and similar institutions and the governments.

There are men today working quietly in private laboratories seeking means to extract by-products from wheat and other agricultural products, of which Western Canada has a great abundance, capable of conversion into fuels, clothing and other necessities and there is no doubt there is great opportunity for more research work along these lines.

The work of some of these men leads to the belief that therein may lie at least a partial solution of some of the west's agricultural problems. It is stated, and not without authority, that the secret of the manufacture of some of these commodities on a commercially feasible basis, has been wrested from test tubes and retorts and other paraphernalia of chemical and electrical engineering laboratories, and that all that is needed to make them a marketable reality is the necessary capital. Where this is to be found for such projects is another question.

From Siam To Surrey

Ex-King Prajadhipok Has Settled Down In England

Ex-King Prajadhipok of Siam has just moved into his new home, on which he spent \$100,000 in improvements, in Surrey, England. It is a red brick house, standing in 15 acres of gardens, and it has four reception rooms, 12 bedrooms and six bathrooms. Every one of the rooms has been specially designed and furnished. The dining-room is in early Queen Anne style, the drawing-room in late Queen Anne. The other rooms are more modern. A motion picture theatre has also been built in which the family entertains visitors. Prajadhipok buys the latest talking films, and favors American gangster pictures.

Cotton and artificial silk material are being made by a process that insures it against wrinkling.

Plan Crime Hospital

Scheme Is Suggested By Several Prominent British Physicians

A movement to found a "crime hospital," where criminals may be sent for psychological treatment instead of being imprisoned, has been launched by Lord Dawson of Penn and several other prominent British physicians and psychologists. Officials of the home office are said to be in sympathy with the scheme, which they believe may lead to revolutionary changes in the state's attitude on crime. An appeal for \$50,000, with which to build a clinic in London, is being made.

A music-hall magician opens his act by guaranteeing to tell the exact age of any lady in the audience. The remainder of his turn is quite popular, though.

And the darkest hour is just before the dawn.

Tragedy In Northern Seas

Russian Scientists Succumb To Cold And Hardships

Twenty-year-old Ian Krukoff related the story of a grim voyage through the wild and icy waters of the White sea with a cargo of 10 dead men.

Krukoff was the lone survivor of a party of 12, all members of a scientific expedition. He reached safety in a lifeboat loaded with the bodies of 10 of the others. The 11th was not recovered.

The 12, headed by the hydrographer, G. Bardinoff, left the expedition's steamer *Toros* on June 27 in a small boat to make a study of the depth of the sea between Archangel and Kandalashka bay, on a route crossing the Arctic circle.

"After three days' work," said the youth, "we decided to return to the ship."

"We were caught by a storm. Mountainous waves capsized the boat and swept away the oars, equipment and our comrade Nikolai Fedoseyeff, whom we never saw again. Struggling in the water, the rest of us with great difficulty managed to right the boat and climb in. "Then for a day and a night we were the prey of a furious sea."

"We had no oars; we tried frantically to row with our hands. The boat constantly shipped water. We scooped it out with our hands and our caps. It was horribly cold. One after another, my companions died of exposure and exhaustion until I was left alone with 10 bodies."

"The sea grew rougher, and it was only by tying my right wrist to the oarlock that I was able to stick to the boat."

SELECTED RECIPES

BANANA CAKE

1/2 cup butter
1 cup white sugar
2 eggs
4 tablespoons sour milk
1 teaspoon soda
1 1/2 cups Purity Flour
2 teaspoons baking powder
1/2 teaspoon salt
1 teaspoon vanilla
1 cup mashed bananas
Method: 1. Cream butter; add sugar. 2. Add well-beaten eggs. 3. Add bananas and vanilla; beat well. 4. Dissolve soda in milk. 5. Sift flour with baking powder and salt and add, alternately, with milk to mixture No. 3. 6. Bake in loaf tin 50 minutes in moderate oven of 350 degrees.

Coronation Plans

Duke Of York Heads Committee In Charge Of Arrangements

The Duke of York will head the committee in charge of plans for the coronation next May 12, The London Gazette announced.

The committee includes Prime Minister Baldwin, the Archbishops of Canterbury and York, Chancellor of the Exchequer Neville Chamberlain, the Earl of Athlone, Sir Samuel Hoare, David Lloyd George, Winston Churchill and Sir Austen Chamberlain.

Tall men live longer than short men, thin men longer than fat, married men longer than bachelors, and vegetarians longer than carnivorous men, according to statistics.

The word rosary is derived from the Latin *rosarium*, which was originally a garland of roses and used to crown the image of the Virgin Mary.

House Flies Breed In Garbage

Dangerous Disease Carriers Menace To Public Health

For many years public health efforts have reduced the scourge of typhoid fever and many other dangerous, contagious diseases by government enforced legislation in respect to the inspection of cattle, milk-pasteurization, the chemical purification of suspected water supplies, and the elimination of many other known breeding sources of disease. But little has been done officially about the common house-fly. Each summer it infests the land wherever mankind exists. It is borne and bred in rotten animal or vegetable matter, lives on filth and refuse. It carries germs of infectious diseases into the home endangering the health of everyone, from the defenceless baby in its crib to the elders of the house who relish the tasty salad, upon which a fly may have recently been feasting and spreading disease germs that have accumulated on its hairy legs.

Public spirited citizens should fully realize the seriousness of this menace and take measures to check it. Searching out hidden unsanitary fly breeding places, keeping homes well screened and foods covered at all times are important. But the quickest and simplest method of killing all flies is to place a few saucers of Wilson's Fly Pads around the house. They will attract the flies and kill them all in a few hours.

The Court Of Claims

Begins Its Sittings After Coronation Date Is Set

After the Coronation date is set, the strangest Court in the world begins its sittings in London. The Coronation proclamation set up the Court of Claims. It considers pedigrees and hereditary rights to serve the King in person.

Some claims which have come before the Court are:

To support the King to the altar.
To carry the Great Spurs (part of the Coronation regalia).
To carry the Cap of Maintenance.
To drink the King's wine as a guard against poisoners.
To have the bed which the King sleeps on the night before he is crowned.

Three claims which are likely to be allowed are those of:

The Earl of Shrewsbury, as Lord High Steward of Ireland, to carry a white wand as symbol of his office.
The Baron of the Cinque Ports to hold a canopy over the King's head at the Abbey.

The Lord of the Manor of Work-sop to present to the King a pair of fine gloves.

Old tramcar bodies, discarded in favor of trolley-buses in various parts of London, can be bought at the depot for \$10 each; carting them away is the real expense.

Plan Huge Liner

New Vessel To Be Longer And Larger Than The Queen Mary

Preparations for constructing a bigger and faster companion to the S.S. Queen Mary were begun tentatively on the Clydebank. In shipping circles it was said the liner, if constructed, would probably be christened the King George V.

An official order for the construction still is awaited. It was suggested the projected liner would have a tonnage of about 85,000 as compared to the 80,773 of the Queen Mary.

An official of the John Brown Company which built the Queen Mary for the Cunard-White Star Line said: "We are almost certain to be given a tender although we have not received an official confirmation of the order."

The company had expected to receive an order for a battleship, but it was understood the admiralty work would be spread instead to other shipbuilders in North England to leave the John Brown Company free for the liner.

Cunard-White Star officials have been inspecting models of the proposed liner while experts have produced altered and refined engine designs.

A Brown official said, "The new ship will be larger than the Queen Mary and faster."

It was understood that present plans call for a longer ship with greater passenger accommodations.

The ship, it was said, would probably be placed in commission in 1934.

Thanks To Stamp Collectors

Heavy Purchases Financed Trip Of Dirigible Around World

It was stamp collectors' heavy purchases of Hindenburg commemorative stamps that made the recent flight of the big dirigible to this country possible, Dr. Hugo Eckener told an audience of New York stamp collectors.

The famous designer said that seven flights were paid for only with the help of the stamp collectors and that they paid the whole expense of the famous trip around the world.

Explorers and pioneers in transportation of all sorts have a source of support in the stamp collectors of the world these days, and the collectors welcome the chance to share in the expense if it means a commemorative cover, suitably marked, for such a thing can never be duplicated, and is likely to increase in value. What a help a few thousand stamp collectors would have been to Columbus! — Port Arthur News-Chronicle.

A water drop cannot rise above the level of the body of water of which it is a part unless the sun's rays draw it up or unless it is driven by mechanical power, as in a spraying fountain.

Importance Is Stressed Of Taking Plenty Of Rest To Relieve The High Tension

No subject is more timely than the importance of rest, for there are probably more tired people in the world today than ever before. Nervous exhaustion has taken the place of the old-fashioned stomach-ache as the prevailing complaint of the times. The direct result of our strenuous life is that everywhere people are skimping on sleep.

Before dwelling on the subject of sleep I should like to point out that considerable rest may be obtained even though actual sleep does not take place providing one gives himself the proper opportunity. Many people have found that a few minutes relaxation even without sleep restores body vigour to enable them to carry on any particular problem with which they may be concerned.

It has been stated that man is the only animal who does not sleep after a meal. Most of us take a meal and immediately start in to work where we left off. Ten or fifteen minutes complete relaxation after a meal is well worth the apparent loss of time.

No doubt many of you know people who can completely relax for a comparatively short period of time, ten to twenty minutes, and start in as refreshed as if they had had several hours in bed. To those of you who are working at high tension let me advise breaking the tension with relaxation at periodic intervals during the day.

During the last war on marches the customary thing was to march for a period and rest for a much shorter period, and it was found that a greater distance could be traversed in this way than by keeping right straight ahead for a longer and more continuous period.

Let us now consider just how much time we do spend in sleep. The ordinary man, without knowing it, in the course of an ordinary lifetime, spends about as much time in slumber as Rip Van Winkle. The following table shows how much time the average person has to sleep, if he spends the normal amount of time in that way, and if he lives to the ripe age of three-score and ten. Make a note when your age is mentioned, and see that you henceforth get what is coming to you.

If you are twenty you will sleep 16 years, 8 months, 3 days and 8 hours. If you are now thirty you will sleep 13 years, 4 months, 1 day and 16 hours. If you are now forty you will sleep ten years. If you are now fifty you will sleep 6 years, 8 months, 3 days and 8 hours. If you are now sixty you will sleep 3 years, 4 months, 1 day and 16 hours. If you are now sixty-five you will sleep 1 year, 8 months, 3 days and 8 hours.

These figures may strike ambitious people as rather alarming. We are apt to dislike the idea that all these valuable years in one lifetime are to be spent in mere slumber. But we must remember that "Sleep is a generous thief. It restores to energy what it steals from time."

It is not with the desire to encourage idleness that we point to the necessity of the average man and woman with responsibilities taking the normal eight hours' sleep per night such as advocated. Rather it is because the conditions which modern life imposes on us encourage us to cheat ourselves of that reasonable amount of sleep which is necessary if the human system is not going to get out of gear. Compared with animals, human beings have few natural resting habits and dispositions. That is partly because of our more active brains; the mind is constantly making suggestions for further activity. For many reasons man is a very restless organism; and the tax is apt to be nervous exhaustion. As someone has said, "If you would live long, you must live slowly."

You are apt to read many things on the subject of sleep that you will find confusing. For instance, one of the greatest men of our time, Thomas Edison, did his very greatest work at an advanced age and yet he indulged in only 4 hours' sleep per night; and 4 hours was the allowance of sleep Napoleon permitted himself. But the latter's experience differed from that of Edison, for he was burned out early in years. He died of cancer, it is true, and while we do not know yet

that there is any relation between cancer and nervous exhaustion there is reason to believe that his later battles and campaigns were lost by a man whose nervous energy was exhausted.

As well as sleeping the normal eight hours every night, it is important that one should sleep well. So to that end a few suggestions are offered. Regular hours are an important factor in the matter of health. Many people who suffer from insomnia have a lack of punctuality to blame for their suffering, and of all ills that can be inflicted upon one there is nothing quite as dangerous to the nervous system as insomnia.

If one is inclined to be early one evening and late the next, the brain is likely to decide that the late hour is the one which it will select for falling asleep. If one will select a certain hour each night as the time for going to sleep the nervous system is likely to respond automatically. Shakespeare said, "How use doth breed a habit in a man," and whether he knew it or not, he was referring to the quiet automatic way our nervous systems adjust themselves to our usages.

It is a mistake to doze off in the evening before definitely going to bed. This takes us to bed in a state of mind that is half-asleep and half-awake, so that it is difficult to have complete sleep when bedtime comes. As the digestive system requires rest, and takes it best while we sleep, it is unwise to indulge in late suppers. There should be an interval of at least an hour and a half to two hours between the last meal and the time of going to bed. It is, however, a good plan for people who have difficulty in getting to sleep, to take a warm drink the last thing before going to bed. It should not, of course, be a nerve-stimulant such as tea or coffee.

Upon consideration of the facts we have already given you, of how many of the next few years you are likely to spend in slumber, it is perhaps not out of the way to make a suggestion or two about the beds we use, the clothes we wear and the room in which we sleep. About the beds—they should be neither too hard nor too soft. The person who reports he is "just as tired when he wakes up as when he went to bed" is likely a heavy man who is sleeping on too soft a bed. On the other hand the bed should not be too hard, or the body cannot rest properly.

Perhaps the bedclothes are too heavy; it should be remembered that an elderdown quilt, of the type that almost everyone uses, is worth several blankets in warmth. The clothing of a personal nature should also be light, but should give adequate warmth. It is important that the feet be kept warm. Good ventilation in the room you use for sleeping is very important. It is a good plan to pull the bed away from the wall a few inches to insure free circulation all around.

One is often asked which is the best position in which to sleep. This is a matter of no importance, because the position of the body is constantly being changed through the night. Little by little, at intervals of from twenty to forty minutes the position is shifted, so that you may turn completely over several times in the night and yet be ready to swear you never moved. So you need not worry about the position in which you sleep; the body will attend to that for itself. Health League of Canada.

A Mysterious Lake

Lake Wakatipu in New Zealand heaves like the beating of a heart with perfect regularity. The rise and fall of the water is about three inches every five minutes, and no satisfactory explanation of the phenomenon has ever been found. This beautiful lake in South Island is shaped like the letter S, and is 52 miles long and three miles wide.

The University of Pennsylvania has a butcher's "bill" in the form of a tiny bit of baked clay. The bill is for three lambs delivered to the city of Ur, forerunner of ancient Babylon, and was presented about 2350 B.C.

Setting Good Example

Owners Of Jersey Cattle Have Attractive Advertising Sign

At the annual meeting of the Canadian Jersey Cattle Club in Toronto in February this year special fieldman William Hunter showed the assembled members a sample of the big farm signs which had been designed to indicate those dairymen who are producing special Jersey milk. It was a big sign done in golden yellow with black lettering and hung on a strong metal pipe and the wording shows that the farm outside which it stands ships "trade-mark" milk to a distributor in Toronto who sells it as "special" Jersey milk at a special price.

A large number of these signs have now been erected and travellers along many highways within 75 miles of Toronto have been remarking upon their attractiveness. In every case they stand at the gate of a neat and prosperous-looking farm, with house and buildings indicating that a superior type of farmer lives there. Their Jersey milk brings them in a premium for quality and whether one believes all that is claimed for high-fat milk or not, the Jersey selling idea is evidently "getting across" with the consumer, for it is beginning in extra returns to their producers.

The Canadian Jersey Cattle Club some years ago secured a patent for the exclusive use of their neat little six-sided sign with the Jersey head in the middle. Slowly but surely they have been campaigning to get city distributors to pay extra for milk from farms producing milk from nothing but Jerseys, and to charge a suitable extra amount per quart to the consumer. The Toronto milk shed is the first big area which has been thus organized and other milk sheds will be organized as soon as possible. Whether other dairy breeds wish to or should follow the example of Jersey is a debatable point, but the new farm signs are giving to their owners a pride in their calling which is well worthwhile.

A Chinese Delicacy

Birds' Nest Soup Believed To Contain Strengthening Properties

Wealthy Chinese relish a soup that is made from birds' nests. The birds are a species of swift, and they are provided by nature with special glands in the mouth which secrete a glutinous substance, and from this they make their nests. These nests resemble gelatine, and when stewed down make an excellent soup. The Chinese believe that birds' nest soup possesses wonderful strengthening properties, and persons are often ordered this soup by their doctors.

Scottish Barber (engaging assistant): "I may lower wages in the summer, because the work's easier." Applicant: "But people get their hair cut just the same."

Scottish Barber: "Ay, but ye dinna hae to help them on wi' their overcoats."

Preparations Being Made In Britain To Establish Transatlantic Air Service

Lower Marine Rates

Vessels Sailing Into Hudson Bay To Be Insured At Less Than Half Of Former Cost

This season, ships navigating through the Hudson strait to Manitoba's ocean port of Churchill, will be insured at rates considerably less than half those in force the first two years of the port's operation.

Minimum rates in effect for ships equipped with gyro compasses have reached a point where the premium for insurance covering all risks on a 5,000-ton ship worth \$250,000 is \$3,115, taking the pound sterling at \$5. In 1932 and 1933 it would have cost \$7,500 to insure the same ship.

In 1934 the rate on such a vessel was reduced to \$6,150 and last year it dropped to \$4,685. There has only been one marine casualty since Churchill was opened. The steamship Bright Fan, outbound, sank far off her course in the strait after striking an iceberg in 1932.

The Bright Fan struck Oct. 1, and sank 18 miles northeast of Wales Island. A 2,357-ton vessel, she was carrying 253,000 bushels of wheat. Her crew of 30 took to boats and was picked up by the ice-breaker N. B. McLean. No one was lost.

Weather Changes

Canadian Scientist Says Dry Periods Always Followed By Moisture

J. Patterson, head of the meteorological service in Toronto, queried about the statement of Henry Wallace, United States secretary of agriculture, that possibility of a "weather change" might make the United States an arid land, said Canadian scientists could point to records dating back 100 years which indicated dry periods were always followed by moisture.

"We know there are general fluctuations in the climate going on all the time," said Mr. Patterson. "Some may be over long periods, others may be short. Since the normal rainfall in the west is not much more than sufficient for agriculture, it means that the variation from that does not have to be very great to produce drouth in one case, growth in the other."

"All we can say is that the previous periods of drouth passed away and we have no reason to suppose the same conditions will not hold again."

Mr. Patterson agreed with the secretary that a thorough study should be made of the drouth problem, using every means at the command of the weather service.

Sometimes a man is unable to make both ends meet because he keeps them headed in opposite directions.

A Scrap Quilt Is Always Popular

PATTERN 5419

This "Nosegay" quilt provides fascinating pick-up work for evenings when friends drop in. The blocks are fun to piece because of the variety of materials you'll use—each block different—each block an adventure in patchwork. See what fetching use it makes of otherwise useless scraps. A real nosegay you'll have, with its colorful pieces; a pastime well worth its while, and a quilt you'll always be proud to show!

In pattern 5419 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

A new British air centre is in the making while mechanics tuned up the first flying boat of a proposed trans-Atlantic fleet.

The giant four-motored plane, prototype of the airliner with which Britain hopes to establish a trans-Atlantic service, made its first appearance on the slip-away at Rochester recently. Others are nearing completion.

The actual work of making Langstone harbor a combined land and marine base for empire and trans-Atlantic routes is expected to begin in another month.

Early next year, it is being predicted at Portsmouth, a service to North America will be under way, with two British and two United States flying boats arriving and departing weekly.

The Portsmouth town council has already approved the project of the airport, to be the largest of its kind in the world and to cost close to \$6,000,000.

Government financial assistance is practically assured, some of it at least from the proposed new air navigation bill with its provision for a 50 per cent. increase in air subsidies to \$7,500,000 yearly.

For Portsmouth the new airport would mean distinction as the air hub of the world. Langstone harbor, which has Portsmouth harbor to the west and Chichester harbor to the east, would become a large inland lake. Several hundred acres of ground would be prepared for the handling of land planes.

Britain's first efforts toward trans-Atlantic service are expected to be directed at Bermuda via the Canary Islands, with the North Atlantic crossing to be attempted later.

Expansion within the empire air service proper this year is to include substitution of Imperial Airways' flying boats for Australian planes from Singapore to Australia; use of flying boats on a service along the east coast of Africa instead of flying over Central Africa with land planes; more efficient service in general through increased subsidies, and carrying of all first class mail by air without surcharge.

When Law Was Savage

England Thought Nothing Of Hanging People For Minor Offenses

In the Middlesex assizes for 1614-15, the year before William Shakespeare died, 418 persons were tried and 160 were condemned to death. Of these 100 were duly hanged. The remainder escaped by pleading their clergy, proving, that is, that they could read and write. Now the population of London at that time was probably a quarter of a million. In the year 1929 the population of Great Britain was more than 150 times as large. Yet in 1929 there were thirteen people hanged for murder in the country. If the law today were as savage as under James I., they would be hanging 15,000 people in Great Britain every year.

But it was not murder in Shakespeare's England. As the detailed figures show, Englishmen then as now, were not particularly addicted to manslaughter. There were only four murderers among the 100 hanged. The others were convicted of burglary, sheep and horse stealing, highway robbery, and no less than twenty-three of ordinary larceny. Over this story the Manchester Guardian puts the sardonic head, "Merrie England."—New York Times.

According To Scientist

Retaining one's beauty it seems is not such an easy task. A Smithsonian Institute scientist has taken thousands of measurements and demonstrated that as a person grows older, his nose becomes longer and wider, his ears lengthen and his mouth widens.

The Smiths are on the balcony and can hear what a young couple are saying in the garden below.

Mrs. Smith: I think he is going to propose to her. We ought not to listen. Whistle to him.

Mr. Smith: Why should I? Nobody whistled to warn me

Livestock Winners at Didsbury Fair

Following is a summary of the
winners in the livestock classes at
Didsbury Fair:

Horses
Stallions:
Clydesdale: W. Fulkerth.
Percheron: 1. C Bolton
2. Sim Good.
1-Yr-Old Percheron: Sim Good.

Heavy Draft Mare:
Russell Fulkerth 1 & 2.
Yearling: N. S. Charlton.

Agricultural Under 1500:
Mare & Foal: S. Bosomworth,
J. Johnston, Archie Weber.
Dry Mare: B. Westfall.

Mare or Gelding: Kershaw Bros.
1 & 2. Bosomworth 3.
2-Yr-Old: Bosomworth, Wait,
Gillrie.
Foal: A. Weber 1 & 3. Glen
Fulkerth 2.

Heavy Draft (Grade)
Mare with foal at foot: R. D.
Smith 1 & 2. N. S. Charlton.
Dry Mare or Gelding 3 Yrs.:
N. S. Charlton.
Dry Mare or Gelding 4 Yrs.:
A. Sherrick, J. Kershaw, Bosom-
worth.
Yearling: G. Dippel.
Foal: K. McCoy, J. Waszut,
R. D. Smith.

In the Hitched Teams, Kershaw
Bros. took 3 firsts; Bosomworth
2 seconds; R. Johnston a second
and J. Johnston a third.

In the Driving & Saddle Classes,
W. J. Fulkerth led the prize-win-
ners with 12 firsts and 3 seconds;
Ranold Johnston 1 first, 2 seconds
and 1 third.

In the Saddle Ponies, Klein and
S. Good each took 1 first; Leva-
good a second and J. Johnston
and John Snyder third prizes.

Cattle
In the Shorthorn Classes Harry Wait
took all the prizes.

Herefords:
L. S. Fisher, Olds, took 5 firsts
and the championship.
Francis Farms took 2 firsts and
2 seconds.
A. Reddon took 1 first, a second
and a third.
A. Robertson & Sons took 2 sec-
onds and 2 thirds.
Hughes Bros. took 1 second.

Beef Cattle:
Harry Wait 3 firsts and D. Bell
1 second.

Fat Cattle: J. Kilpatrick 1st.
Dual Purpose:
1. D. Bell. 2. Harry Wait.

Holsteins:
Hugh Roberts 3 firsts, 3 seconds,
1 third and championship male.
John Liesemer 2 firsts, 1 second
and the Ranton Cup.
Billy & John Parker 2 firsts.
J. Kilpatrick 2 firsts.
J. Allen 1 first and 1 third.
Tom Morris 2 seconds.
D. G. Hardbatt 2 seconds.

Ayrshires:
H. Hansen 2 firsts, 2 seconds and
the Carstairs Creamery Cup.

Guernseys: Harvey Stevens 1 & 2.
Grade Dairy:
W. Bruce 1 first and 2 seconds.
Hugh Roberts 1 first and 2 thirds.
J. Allen 1 first.
Ira Levagood 1 first.
L. Woods 1 second and 1 third.
Mrs. Frank McDonald 1 third.
Grade Dairy Heir:
1st and Didsbury Creamery Cup,
Hugh Roberts. W. Bruce 2nd.
John Allen 3rd.

Hogs
Yorkshires:
Gordon Pearson 2 firsts and 2
championships.
W. Bruce 1 first.
D. G. Hardbatt 2 firsts, 4 sec-
onds and 1 third.
Archie Weber 1 first and 1 second
W. Thurlow 1 first and 1 second
Tamworths:
Archie Weber 2 firsts.
Kershaw & Sons 4 firsts.
Kershaw Bros 1 first, 3 seconds.

Sheep
Southdowns:
Hughes Bros. 1st. Westfall 2nd.
Grade Sheep:
Hughes Bros. 2 firsts.
N. H. Featherstone 1 first and
3 thirds.
F. Westfall 1 second and 1 third.
Gordon Pearson 1 first.
W. Bruce 2 seconds.
R. D. Smith 1 second.

Thank You!

August Krebs takes this means of
thanking his many kind friends and
neighbors for their thoughtfulness in
sending him fruit, flowers, candy,
tobacco, cigarettes, etc. during his
confinement in the Calgary General
Hospital and Didsbury Hospital.
During his entire sojourn in hospital
of about six weeks' duration, August
says he was without a visitor only
on two occasions.

TWO NEW TIRES to keep wheels MOVING

Where the going is hardest
these tires will pull you through
while other tires slip, clog, stall
and let you down.

The Lug Tire is designed for
trucks, tractors, graders, etc. It
gives maximum traction forward
and backward in deep mud or
snow without sacrificing smooth-
ness, comfort and silence on im-

proved roads.
The Studded Tire is designed
for the cars of farmers, doctors,
mail carriers or for anyone whose
duty takes him into the mud and
clay of unimproved roads and
into snow on any road.

Come in and let us show you
these remarkable new Goodyear
Tires.

With its wonderful grip
the Goodyear Lug Tire pulls
through mud or gumbo.

Unless actually buried
itself, the Studded Tread
Goodyear will pull through
the worst of roads.

In snow the Goodyear
Lug Tire avoids delays, pro-
tects loads, allows faster,
safer speeds.

Burnside Notes.

Miss Zook is a visitor with Mrs
B. Woods.

Dick Metz spent Sunday at May-
ton with Mr. Jim Crowell.

Lewis Spraggs is helping Mr. Fred
Harderer with the harvest.

Fred Metz was a visitor on Sunday
with Mr. and Mrs. B. Woods.

Miss Elsie Topley, of the Didsbury
Hospital staff, was a weekend visitor
at her home here.

Miss Newman, of Victoria, B.C.,
is the guest of her friend, Mrs. Geo.
Burns.

Mr. and Mrs. Guy Schneider and
family spent Sunday with Mr. and
Mrs. Chris Ehret.

Mr. and Mrs. Jack Gooder, of
town, visited on Sunday with Mr.
and Mrs. H. B. Campbell.

Mr. and Mrs. N. Eckel spent Sun-
day at Sunnyslope with Mr. and
Mrs. E. R. Dawson.

Mrs. Wm. McCulloch returned on
Tuesday from a week's visit with her
son Bob and his wife at Banff.

Measrs. Claude Shields and Fred
Metz made a business trip to Strath-
more last Wednesday.

Miss Mary Dyck underwent an
operation for appendicitis in the
Didsbury Hospital on Monday night
and is reported to be doing nicely.

We are glad to hear that Mrs.
Joe Clark, who has been laid up with
a bad attack of tonsillitis, is much
improved in health.

Miss Dorothy Cipperley, of Cal-
gary, spent the weekend at her home
here. Mr. and Mrs. Cecil Cipper-
ley were also weekend visitors with
the former's parents.

SOCIAL CREDIT NOTES

The Didsbury social credit study
group No. 1 held its regular meeting
at the home of Mr. and Mrs. A.
Schwesinger. After correspondence
from the Premier and others was
read, the president, Mr. A. Schwe-
singer and Mr. N. D. McDonald
gave a report of the joint meeting
held at the Atlas Lumber Yard
office. Mrs. Schwesinger gave a
report on Mr. Aberhart's speech
which he gave on the occasion of the
mass picnic held at Dog Pound
stampede grounds which included
an explanation of the use of Prosper-
ity Bonds. For instance, that if
\$5,000 of prosperity bonds allotted
to each constituency would only
turn over twice a week, it would
move \$40,000 worth of goods in one
month and wouldn't business people
be glad to put one cent stamp on
each week if they could gain such an
increase in business? Mr. Schwe-
singer and Mr. McDonald, jointly
read and explained parts of the con-
stitution which resulted in a lengthy
discussion. Two members joined
the group. Lunch was then served
and a lively conversation brought a
pleasant evening to a close. The
next meeting will be held at the
home of Mr. and Mrs. Lawrence
Dickau, Monday, August 17.
—Contributed

The Didsbury Pioneer Group met
at the home of Otto Klein on Mon-
day evening. In the absence of the
president, Mr. H. Sinclair acted as
chairman. Correspondence was
read from the District Engineer of
Public Work regarding prospects
for work for unemployed. Registra-
tion forms were discussed and stu-
died. The next meeting will be
held at the home of Mrs. Mack on
Monday August 10.

Doings of Our Neighbors

AT CARSTAIRS: Carstairs School
Board has set the mill rate for school
purposes at 11 mills on rural prop-
erty and 16 mills on town property.
In each case one mill is for debent-
ure purposes and the balance for
current expenses.

AT INNISFAIR: Dave Arnell,
Auctioneer, of Innisfail, died sudden-
ly at the wheel of his car while driv-
ing to Sylvan Lake last Sunday
week.

Items of Interest

No decision had yet been made by
the provincial government as to
whether there would be a special
fall session of the legislature, Prem-
ier Aberhart said last Wednesday.
While the session had been suggest-
ed, there were a number of factors
to be considered before the necessity
of calling the House together could
be decided, he said.

Declaring that the worst drouth
in thirty years made it imperative
that they be given a better price for
their milk or be forced out of the
dairy business, milk producers ap-
peared before Judge A. A. Carpen-
ter, chairman of the board of public
utility commissioners, at the Calgary
court house last week. Milk produc-
ers are seeking increased remunera-
tion from \$1.95 per 100 lbs. of milk
(the present price paid by distribut-
ors) to \$2.40 per 100 lbs.

Notes Here and There

Miss McIntyre of Olds gave a
rug demonstration in the Rugby
School, Monday afternoon, which
was most interesting and instructive,
rugs being demonstrated made of
crepe paper, gunny sacks, etc.

Mr. and Mrs. Fred James of Cal-
gary, visited with Mrs. Dobson on
Sunday. Mrs. Dobson returned
with them for a weeks visit to Cal-
gary.

Mr. Bob Reed, of Cremona is to
be the next teacher at the Elkton
School.

Miss C. McIntyre of Olds had
dinner with Mrs. A. Wahl on Mon-
day.

Mrs. Hosegood visited her daugh-
ter, Audrey, in the Holy Cross Hos-
pital on Sunday and reports that she
is doing nicely.

Mr. and Mrs. E. Lowrie and
family spent Monday and Tuesday
at Gull Lake.

Mr. and Mrs. S. Brown have
rented a cottage at Sylvan Lake for
month of August.

Mr. N. Campbell captured the
men's running prize at the Dog
Pound picnic on Friday.

Mrs. Hogg was the representative
of the Rugby W.I. at the Farm
Women's Week at Olds and not
Mrs. Hosegood, as stated in last
week's paper.

**INDEPENDENCE
OR NOTHING**

WITH the aim to live on in service through the
span of many lifetimes, to what can a newspaper
bind its policy so that it may endure in strength
and grow in the respect of its readers. Movements
spring up like mushrooms over night and wilt in
a day. Governments have their brief years of
power and pass into the limbo of forgotten things.
Companies and corporations wax and wane with changing
policies and changing hands.

TO none of these things can a good newspaper be fettered.
It is larger than all. It must have a longer view, a broader
scope, a deeper inspiration. It is not a voice for the opinions
of the few but a faithful echo of the great voice of the
people.

IT must be free, it must be independent, to grow with the
upward-striving national mind and to interpret faithfully
the wishes of its citizens. Independence—or nothing. In-
dependence is a newspaper's very life. Preserve that free-
dom of the press and you keep a safeguard to your own
liberty.

By all means form your own opinions, from unbiased
news columns. Your right to say what you think, your
right to criticize freely—all these rights cherished by a
free people are upheld by the independent newspapers
of Southern Alberta.

WORLD HAPPENINGS BRIEFLY TOLD

More than 3,500 school children in the unorganized districts of Manitoba had their teeth fixed during 1935 by travelling dental clinics.

A super-silencer, which can be fitted to aeroplanes, motor cars, motorcycles and buses has been invented to eliminate street traffic noise.

Elsie Janis, actress and "idol of the army" during the Great War, has announced her intention of giving up all her "worldly possessions" and devoting her life to charity.

Hope that in another five years Canada's annual gold production would reach \$200,000,000 was expressed at Sault Ste. Marie, Ont., by Hon. T. A. Crerar, Dominion minister of mines.

The Soviet government has presented an official demand to Japan to call a halt to poaching by Japanese fishing vessels in Soviet waters off the Kamchatka peninsula in far eastern Siberia.

A portion of the remains of a giant mastodon which roamed this country about 1,000,000 years ago, has been unearthed on the estate of Conrad J. Osman, near Hillsboro, N.B.

Order-in-council published in the Alberta Gazette carries revisions to the Optometry Act, ordering that optometrists cannot offer free examinations of eyes, engage in misleading or price-reference advertising, or offer premiums or refunds.

The government icebreaker N. P. McLean has left Quebec for her annual voyage into the north, where she will guide freighters in and out of Hudson's Straits. Before entering the straits, the vessel will be used for survey work around the Straits of Belle Isle.

One of the largest consignments of butter ever routed via Vancouver was recently shipped from Alberta and Saskatchewan. The shipment totalled 794,000 pounds, was packed in 14,000 boxes and to transport it 25 railway cars were required. It will be sent to Great Britain.

Greetings From Namesake

Halifax, England, Sends Parchment Roll To Nova Scotia City

Greetings extended by the borough of Halifax, in the west riding of York, England, to Halifax, Nova Scotia, were delivered in the council chamber recently.

Artistically executed on parchment, the scroll was protected by a cylindrical leather case, and was presented to Mayor Cragg.

The address came to this country aboard the giant liner Queen Mary.

Soviet Newspapers

More than 10,000 newspapers in 86 languages are published in the Soviet Union. This aggregate circulation reached 37,000,000 copies in 1935, whereas this year it increased to 39,000,000 copies. Books and magazines are now issued in more than a hundred languages.

Although the Empire State Building juts nearly a quarter of a mile into the air, it can be swayed only one-tenth of an inch in the strongest wind that will normally blow in New York, which is a gale of 110 miles an hour.

Importance Of Gold Production

At Rate Of Increase, May Soon Surpass Agricultural Products In Value

Hope that in another five years Canada's annual gold production would reach \$200,000,000 was expressed by Hon. T. A. Crerar, Dominion minister of mines, who, with Hon. C. D. Howe, minister of railways and canals, addressed the Sault board of trade on the eve of a trip to the mining areas at Michipicoten and Goudreau.

Gold production in Canada last year amounted to \$116,000,000, said Mr. Crerar, while total value of the nation's mineral production, including both base and precious metals, was \$222,000,000.

Mining development in Ontario is helping to bridge the gap between eastern and western Canada, he said, after being introduced by T. E. Simpson, formerly chief whip of the Conservative party in the House of Commons. While he ranked agriculture first among Canadian industries, in another 10 or 15 years, or perhaps sooner, mineral production might surpass it, Mr. Crerar said.

Elephants cannot trot or gallop. A walk and a shuffle are their only gaits.

Cannot Identify Soldier

Efforts Of Doctors For Nineteen Years Are Unsuccessful

What may be the last attempt to establish the identity of the "living unknown soldier," who has baffled scientists since he was taken to Paris just after the World War, is to be made by three eminent French psychologists. Nineteen years ago the man, whose name was believed to be Mangin, was found wandering in the streets of Lyons, France, dressed in soldier's uniform. He knew nothing about himself or his doings, and could not remember his name. Mangin was sent to an asylum, where he was questioned by famous doctors for year after year. Never once did they get a lucid statement from him. Meanwhile, men and women from all parts of France have claimed him as husband or father or brother. More than 200 letters have been received trying to identify him, but without success.

Absent-Minded Professor (to secretary): "I am going down to the town and if by any chance I happen to return during my absence, keep me here till I come back."

Church is the only place you have to be early to get a back seat.

Crochet This Bag and Saucy Sailor

Accessory
Set

PATTERN 5343

Your Summer suit needs them—your print cries for them—these crocheted accessories which require so little time to make. If you're longing for a "sailor"—crochet one from this simple pattern. Its easy stitches are clearly explained, as is its blocking. Alternate stripes of plain and rib stitch are used for hat and bag alike, the latter boasting a novel "peep-hole" top. Make the set in cotton or linen thread.

In pattern 5343 you will find complete instructions for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

FIFTIETH ANNIVERSARY TRAIN

From the rear platform of the Canadian Pacific Railway's 50th anniversary train, The Dominion (upper oval) H. J. Main, general superintendent, Manitoba district, speaks into the microphone to the crowds assembled to cheer the jubilee event. With him are Mayor John Queen (left), Hon. John Bracken, premier of Manitoba; His Honor, W. J. Tupper, K.C., Lieutenant-Governor of Manitoba, who spoke in reply, and W. M. Neal, vice-president of the company's western lines. In giving the welcoming address, Mr. Main followed the precedent set 50 years ago, when the general superintendents met the sturdy pioneer train on its trans-Canada journey.

Below are hundreds assembled in the Sir William Whyte park, opposite the station at Winnipeg, where Premier Bracken gave a brief congratulatory address where the Countess of Dufferin, C.P.R. engine No. 1, now stands wreathed in flowers instead of smoke. In the left foreground can be distinguished Mayor Queen, Mr. Bracken, Mr. Neal and the Lieutenant-Governor and three old-time railroaders: James Goddard, who drove the first Canadian Pacific train from Calgary to Winnipeg in 1884; J. St. Leger Maginn and Andrew Murdoch, all of Winnipeg.

Haile Selassie

A Man Who Refuses To Compromise With Disaster

There is pathos in the account of Haile Selassie's interview with Captain Anthony Eden, but something heartening, too, in the impression it gives of a man who refuses to compromise with disaster. Haile is no Richard II. of Shakespeare's drawing. He does not wish to talk of graves and worms and epitaphs, to choose executors and discourse of testaments, to sit upon the ground and tell sad stories of the death of kings. He would rather talk about what those who let him down when he depended upon them intend to do to make amends for their desertion. As they do not intend to do anything, it must have been Captain Eden who was embarrassed rather than the Lion of Judah.

The Negus remarked that there was still armed resistance in Ethiopia. Captain Eden replied frankly but firmly that such resistance as is left in that conquered country represents tribal separatism rather than loyalty to the King of Kings. He advised Haile Selassie to resign himself to the fact that he is an Emperor without an empire, assuring him that the Italian conquerors could not be expelled. To which the Negus rejoined that he would never abdicate but would struggle to his last breath for his country and crown.

Along about that same time the Swiss Federal Council was advising Haile Selassie not to attempt to reside in a villa he owns near Geneva. He was welcome, it said, for short visits upon which he might present his claims to the League of Nations, but Switzerland would be unable to offer lasting hospitality as long as Ethiopia continued to consider itself at war with one of "our neighbors." Not much comfort in that for a man who has resolved to fight to his last breath! The path ahead of him seems to be the old sorrowful road down which so many other royal exiles have passed to perpetual disappointment. But the world notes to his credit that he marches along with his head up and his spirit seemingly unbroken. That, after all, is about the most kingly thing a king can do in such circumstances.—New York Sun.

Potatoes From Prairies

Potatoes from the prairie provinces are being marketed in Montreal, the shipments being induced by high prices prevailing. Ninety-pound bags of whites from Alberta realized \$1.65 or somewhat lower than the prices paid for Maritime stock.

A leader of men is one who sees which way the crowd is going and then steps in ahead.

Construction Work

Over Nine Million Dollars Expended On New Dwellings In 1934

Although construction work in Canada, as in other countries, has been in the doldrums in recent years, a statement just issued by the Dominion Bureau of Statistics shows that in 1934, at the very ebb of the depression, expenditures on new dwellings in Canada amounted to \$9,207,913. If most of this expenditure was on modest homes, with an average value of five thousand dollars, it would account for 1,840 homes, and if these homes were built on fifty-foot lots, on both sides of the street, they would form an avenue of new buildings nearly nine miles long. More than half of this avenue would be occupied by Ontario homes; Quebec would come next, and British Columbia, Alberta, Nova Scotia, Manitoba, New Brunswick, and Saskatchewan would follow in the order stated.

Of the different classes of construction work in Canada in the year under review, that on streets and highways was much the largest, amounting to over 39 million dollars. The excellent roads which beckon the tourist to Canada are among the results of annual expenditures of this nature. Other large construction classifications were factories and warehouses, government and municipal buildings, and churches, church halls, and schools. The total expenditure on new construction was almost 116 million dollars, and over 70 million dollars were spent on alterations and repairs.

May Sell Buckingham Palace

Offices And Business Premises Now Encircle Royal Residence

Buckingham Palace, home of England's kings and queens for many years, may be sold as a building site for \$15,000,000.

Valuers have surveyed the palace and its 40 acres of grounds, and, if it is decided to sell, part of the latter will be preserved as a public pleasure ground. It is understood a city of London syndicate is interested in the scheme.

Owing to the changing character of the neighborhood, the possibility of giving up the palace as a royal residence first was considered by the late King George. He announced that he was agreeable to the sale of the site for building purposes.

It is known that the King prefers his present bachelor home at York House, St. James.

If Buckingham Palace is sold, the "Court of St. James" would once more become an accomplished fact, and not, as now, merely a courtesy term.

A new business centre in late years has grown up around Buckingham Palace. Already offices and business premises virtually encircle it. Grosvenor Place, Grosvenor Gardens, Buckingham Palace Rd., and other adjoining thoroughfares that were given over to residential purposes until the end of the war, now have been converted into offices and business chambers.

Italy's Policy In Ethiopia

Experts To Study The Resources Of The New Empire

Italy's policy in Ethiopia will be "no gold rush but slow, steady, well-planned concentration," said Count Giuseppe Volpi, charged by Premier Mussolini with organizing branches of industries in large groups, including technical, scientific and practical experts, to study the resources of the new empire.

Six principles will govern the development, Count Volpi said. They are:

"Adequate preparation in advance so effort and money will not be wasted. Private enterprise will be protected, but there will be no monopolies, and there will be no harum-scarum rush of mushroom business men. No black army will be set up. The natives will be needed as workmen. The Italian race will be kept pure and every effort will be made to prevent co-mingling of the whites and blacks."

Count Volpi saw economic possibilities in coffee, cotton, wool and minerals.

If you think your arguments are so convincing try persuading the small boy that he ought not to have a pet dog.

Coleman Hot Plate Cooks with Air!

Handiest cooking unit for kitchen, summer cottage, camp... the stove of a thousand uses.

- Burns 95% air—6% fuel
- Makes its own gas from gasoline
- Use it anywhere. No pipes nor connections
- Lights instantly. No pre-heating
- Economical. One gallon of fuel operates both burners 15 to 20 hours.

PRICED AS LOW AS \$7.00! One burner and two burner models available. Ask your dealer or write for FREE FOLDER! THE COLEMAN LAMP AND STOVE CO., Dept. W222, Toronto, Ont.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER I.

The noisy blare of Fifth Avenue traffic merged into the city's brassy, blatant symphony. Blasts of motor horns; a raucous-voiced four-note siren; the occasional shrill metallic whistle blasted by an Argus-eyed traffic officer; the rising and falling monotonous obligato of newsboys calling their wares; laughter, chatter, voices merging; that indescribable twanging hum—the blazing, bawling symposium of sound that is New York.

To one, half-hearing, it all had dissolved into the deep-throated tones of an organ. Playing—a wedding march. And each note that pealed out stabbed deeper into a heart already crushed and bleeding, hurt almost to an unconsciousness of pain.

The girl in the smart black tailleur that spelled Paris, which close inspection would have shown had been too often brushed and pressed, stood before the great plate glass show window of a Fifth Avenue shop, gazing with rapt attention at the tableau that was so meticulously and elaborately presented there for the observation of Avenue strollers. Exotic-looking waxen manikins, tricked out in the latest fashions, portrayed there the dream of every girl's soul—a wedding ceremony. The shining black beetles of crawling cars in the street behind her rose sonorously in the swell of a wedding march, each note distinct, aching.

There was the bride, a glamorous figure in ivory satin and old point lace. Satin that gleamed like a shroud of mingled sunlight and moonlight about her slender grace. Lace like cobwebs spun from the froth of clouds of silver and snow. She carried a bouquet of life-like flowers in primly clasped hands, and a misty veil that cascaded in foamy illusion of tender white tropical moonbeams clouded her silky yellow hair and spread out behind her on the deep maroon velvet of the simulated church aisle carpet. White satin ribbons that stretched as from pew to pew, added to the illusion.

There were bridesmaids, too, startlingly colorful images with wide, filmy hats and molded chiffon velvet gowns in lovely pastels. There was a tiny flower girl posed in the act of flinging her posies in the path of the goddess in white satin. There was even, at the correct distance behind the bride, the matron of honor, on whose flaxen features there seemed to be expressed the proper amount of happy cynicism as she listened to the strains of the wedding march that were real alone to the girl outside the window.

As the girl watched she appeared—and felt—no less waxen than the models on whom the deep wells of her eyes rested, while slender gloved hands clenched tightly at her sides. Indeed, had the painted eyes of the posed damsels been possessed of the

power of sight they would have observed that she stared through them rather than at them, and that in the dark pools of her eyes were visions which were beyond their understanding. And a symposium of pain and weariness.

They would not have understood. Who could have quite understood the mystery of that girl's eyes as she stared at the manikins, hearing that muted music which pealed from a strange, grand song—the song of Life, and Love to which she must not listen?

For here was no young bride-to-be making mental notes for her own trousseau or wedding, picturing herself as the central figure of some stage pageant as that enacted by the waxworks. It was doubtful if she even saw the exquisite lines of their flowing gowns, save subconsciously, as that sonorous wedding march music beat on her mental ears.

It was the theatrical spectacle as a whole, symbolizing as it did the very spirit of romance which must be forever denied to her, which held the girl enthralled with a deadly fascination. She was transported mentally into a mad maze of thought which would have astounded and horrified the busy shoppers who jostled by her slim body, or those languid riders in the purring black beetle cars that thronged the avenue.

Any other girl in all the world, watching that waxen tableau could have dreamed. Rich or poor, dreams could not have been denied her. Any girl of whatever station of life might have gazed at that bridal procession, sighed over the beauty of it, closed her eyes and imagined herself stepping into the dainty shoes of the ivory satin goddess, and whispered ecstatically: "Some day!" And some day there would have been. Life was like that. For any other girl in the world.

But Starr Ellison must remain aloof from all the natural desires of her sisters, must put from her their dreams, their longings and yearnings for romance. She knew it, and the knowing was a castigating, bitter ache that seared her soul to its utmost depths. One stern, corroding commandment dominated her life—the little of life which was left to her. An eleventh—a most modern commandment:

"THOU SHALT NOT LOVE!"

The words burned in her brain. They seemed to dance in dazzling pinpoints of light on the background of that shop window scene, jibing at her. Thoughts whirled through her dizzied brain with lightning speed, jumbled bits of memory, too terrible to be recalled, too insistent to be denied; little things, fragments of speeches; remembered lines; and clearest of all, words learned long ago by rote:

"Love watcheth, and sleeping, slumbereth not. When weary, it is not tired; when frightened, it is not disturbed; but like a vivid flame and a burning torch it mounteth upward and securely passeth through all. Whoso loveth knoweth the cry of this voice."

Love! That could be love! The love she was never to know; must never know because of that relentless commandment. "A vivid flame and a burning torch—" She knew them, but they were not the flame or torch of love. They were burning out her life, sweeping back all hope that love should ever pass their blazing boundaries. Love—not for her! Never, never for Starr Ellison, in life, whose merciless commandment was "Thou Shalt Not Love!"

The simpering waxen faces inside their glassed enclosure faded. The foamy, lacy cloudiness of wedding pageantry blurred. Instead, Starr saw herself, as she had stood but a short time before, in a doctor's office. A new doctor he was, a man she had never seen before. He would tell her the truth. It was the truth she wanted.

The picture that came to her, spread out for her new memory, was unreal, as unreal as its present representation in the middle of a busy New York thoroughfare.

It had not been like the usual doctor's office of shiningly white things that spoke of antiseptics and human ills. It had been a cheerful place that spoke of life. While he had sat there, robust and calm and spoke of—death. Unreal, all of it.

She remembered the sun streaming through the long blue velvet drapes at the window. It fell in laughing, golden patches across the Chinese blue of the rug. There had

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk. A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. Soc.

been a tree in the little patch of garden behind that office on the ground floor of the old fashioned brownstone and outside in its branches a bird had suddenly sung. As if its heart would burst with the gladness of being alive on this beautiful day. Alive! How had that songbird come to New York with that message when.

The scent of the roses in a big bowl on a table had come poignantly to her nostrils that quivered—just a little. And the doctor had said with blunt frankness in the midst of all that life:

"You might as well know the worst. You can't live another six months—"

There may have been more. What did it matter? What else he or anyone could say, after that.

Perhaps he had been amazed because she had betrayed no surprise. How could he know that she had been prepared for his words that had made her accept them stoically as if she had almost been expecting the pronouncement of her doom. She was expecting it! That representative modern doctor's words had only served to confirm what she already knew in her heart. She was a falling star; her pitiful light was almost burned out.

The same baffling, unnamable malady which had destroyed her father and John Lessing, her father's closest friend, companion with him through a lifetime of adventure and research, who had shared with him the insanity of his dreams that had taken them to living alone for that vast desert spot peopled with centuries-gone kings and queens, princes and princesses, councillors and men of high degree who had belonged to a glorious civilization before the name of America was known to men, was now destroying her, too. The three-thousand-year-old curse of a forgotten Pharaoh had reached out of the tomb again to strike into the midst of this modern great city's millions!

Starr's hands were clenched at her sides, hard and moist. Her lips moved in a repetition of words she could never forget:

"Thou and thy children and thy children's children—"

As she had walked from that strange doctor's office with head erect, unmindful of all those little things about her which whispered and sang of life, she had not spoken. She had not told him how well she knew that age-old words were being fulfilled. The curse had passed from her father to her. But it would not pass to Starr's children, because she could never have any. She could not live; she dared not love! It was a commandment in its primary meaning: "Thou Shalt Not Love!"

Egypt, and the tomb of Tut-Amen-Ra and the lovely, slender, sinuous, almond-eyed priestess whose long eyes had held the mystery of

A NEW SERIAL STORY

Starr Ellison, a haunting, wistful beauty, wanted the glowing, shimmering radiance of warm and languorous days and entrancing, moon-bloomy nights; the roar of love's primitive tom-toms tingling her blood, the clashing of cymbals, the castanets of life's dance.

It however had been decreed that these must be forever denied her as her short life was to be only for play but never for love. How her entire life was changed by her chance meeting with Michael Fairbourne; then the apt meeting with the most dangerous man in New York! Did she not bear the reputation of being the most dangerous woman? Play-Boy—and Play-Girl!

How Fate and young love change the life of this "lovely creature of fire and ice" makes this novel a thrilling romance.

IN THIS ISSUE

age-old love, and whom Ra had loved too well to be parted from in death, were so far away. Yet here, in the word's greatest metropolis of this new wonder-age, Starr Ellison was pursued by an invisible menace more potent than any tangible danger of modern city life.

It was fantastic, unbelievable, cruel! For a moment Starr swayed dizzily as the maelstrom of traffic roared about her. Automobiles, the rattle and clatter of trucks in the distance, the muted hum of underground traffic like an insistent drumming. The shriek of a policeman's whistle—it sounded dimly like one of those strange pipes that have been played in Egypt from time immemorial, always playing the same monotonous tune. . . No! She would not think of that! She must not! This was New York. People all about her, talking, laughing, hurrying—

Starr writhed suddenly as she realized that for minutes that might have been years she had been standing stock still before that pageant in the show window, that those modern-mummy faces were still staring her out of countenance as if pounding in on her tortured brain that the fiery finger of her destiny was pointing at her from that shining plate glass. She wheeled around, away from the mockery of that complacent bride and the imitation happy retinue.

A vivid-eyed girl she was, with long, curling hair as black as a gypsy's. Long, dark, heavily fringed eyes that were deeply mysterious with the feminine secrets of the ages. Her skin was the color of the bride's ivory gown, almost transparently pale. Her figure held a startlingly sinuous grace, but was slim almost to the point of fragility.

The tailored frock she wore spoke for itself as once having had its place in some such smart shop as that before which she stood. Signs of wear, though, were carefully hidden, and it would have taken the sharp eyes of a woman to have discovered them. To a man she would have appeared what once she had been, a girl used to ermines and orchids. A long time ago—so terribly long, it seemed now. In the dim distant past when life meant something.

Even shabby clothes, though, could not have detracted from Starr Ellison's beauty, a haunting, wistful beauty which swathed her in an aura of mystery, accentuating the enigma of her eyes. Those velvety black eyes burned with a bright, unnatural light, as though they had looked upon strange, unearthly things remote from the consciousness of the plodding everyday mortal. As, to her own despair, they had.

"It isn't fair!"

She had forgotten where she was; or did not care. With clenched fists Starr stood in the midst of the seething, busy city, and railed against the fate which condemned her, and set her apart, one alone, from the happy, laughing, careless, unthinking throngs who uninterestedly passed her by.

There was so much she wanted of life! She wanted life itself! And love! With her father and John Lessing it was different. They had already lived their lives, lived to the full, known all its joys, long before the curse had swooped down on them. Neither of them were young, for Bruno Ellison had been past forty when he had married, and Starr was only twenty now. Twenty! And her life, too, was spent, was over, without ever having been lived!

Twenty—and not once had she ever had a chance to live as youth of this modern day, her own day, lived, or knows life. Since the day she was graduated from high school she had worked with her professor father, followed his expeditions which were the breath and substance of his soul. She had been his companion, prepared his notes, taken the place, with heartfelt earnestness and to the extent of her ability, of the companion he had lost when his young wife had died in giving birth to Starr. There had been no room in that busy routine for love affairs, for anything of living—except dreams.

Starr had dreamed. That had been her life. Love she had dreamed of in quiet moments as a magic flame waiting in the misty, unopened pages of her future. That same love that "like a vivid flame and a burning torch mounteth upward and securely passeth through all." And now—Now came the damning realization

for STIFFNESS!
Plenty of Minard's well rubbed in soon sets you right. Baths the sore part with warm water before you start.

34 You'll soon limber up!
MINARD'S
"KING OF PAIN"
LINIMENT

that she had no future. The pages of her life book were all but thumbed through.

So much she had wanted! Freedom to live, a wide horizon, the great winds of passion, the terrible beauty of an entrancing love of which she had been so complacently sure in that "some time." She wanted the glowing, shimmering radiance of warm and languorous days and entrancing, moon-bloomy nights. She wanted the roar of love's primitive tom-toms tingling her blood, the clashing of cymbals, the castanets of life's dance. She wanted—Oh, so much more than she could express. It was in her heart—an aching need.

Just six months of life. And the scant odds and ends of change that rattled in her all but empty pocket book forbade even the briefest excursion into the scintillating world of romance. She would go down into eternity without even a memory!

A passionate surge of rebellion shook Starr's fragile form. Her eyes were like ebony fire, blazing out from her camellia-like face, as with fists starkly clenched, oblivious to her surroundings, she stood looking up through the sky-scraped canyon of the street to the misty streak of blue-white of the far-away heavens.

"It isn't fair! It isn't fair! I won't be snuffed out like a candle! I want to live! I want to feel all that any other woman has ever felt! I want to play!"

"So you want to play, do you?"
(To Be Continued)

Little Helps For This Week

Commit thy works unto the Lord, and thy thoughts shall be established. Psalm 145:2.

Lord, I my vows to Thee renew;
Disperse my sins as morning dew;
Guard my first thoughts and all my will,
And with Thyself my spirit fill.

Every morning think for a few moments of the chief employments of the day, any one thing of greater moment than others, your own especial trial, and the occasions of it which are likely to come during the day, and by one short act commend yourself beforehand to God. Offer all your thoughts, words, and deeds to Him, to be governed, guided and accepted by Him. Choose the occasions of the day, which bring with them the most trial to you, to commend yourself more especially to the guidance of God.

Was In Jameson Raid

Mining Magnate and Associate Of Cecil Rhodes Dies At Capetown

Sir Lionel Phillips, bart., mining magnate and associate of Cecil Rhodes, died recently at Capetown, South Africa, at the age of 80. Sir Lionel went to Johannesburg in 1889, and at the time of the Jameson raid was one of the four Uitlanders sentenced to death by the Transvaal Judge Gregorowski. His sentence was subsequently commuted to a fine of £25,000 (\$125,000).

Now it is predicted that trains soon will rival airplanes in speed. But there still will be automobilists who will try to beat them to the crossing.

A boxing match was recently broadcast by television in Soviet Russia and state officials plan transmission of circus performances and opera scenes.

Ninety-two-year-old E. H. Bailey of Florida conducted the University of Tampa band in compositions of his own.

The successful man is one who has people doing what he wants them to do.
